

ELOPOULOS

PLASTIC SURGERY & MED SPA

Diamond Glow

Pre-Treatment:

The system is safe, highly effective treatment for simultaneous exfoliation of the skin with the delivery of a topical formula to target a specific dermatological condition. Exfoliation promotes the reduction of fine lines wrinkles, minor scars, acne, stretch marks and sun damage. It also regenerates the epidermal cell structure resulting in skin elasticity and a more youthful, pliable, smooth skin. Topical formulas penetrate the skin to treat specific conditions such as acne, hyperpigmentation, photodamage, dehydration and fine line wrinkles.

-Treatment is noninvasive with minimal downtime

-If you are prone to cold sores please discuss with the provider. We may recommend pre-treatment with Valtrex.

Post-Treatment:

-Avoid any acids on skin same day as treatment

-Wear SPF to protect your skin as it may be more prone to sun exposure
